Workshop

Week 2

Question

1. What were two unexpected uses of social networking?

2. What does the term ubiquitous computing mean? Look it up using a search engine. Write a paragraph explaining the meaning.

3. How will we react when we can go into a hospital for surgery performed entirely by a machine?

4. How will we react when chips implanted in our brains enhance our memory with gigabytes of data and a search engine? Will we still be human?
