Week 19 Tutorial

Question 1

Using BorderLayout, create a GUI where user clicks a button button. The label shows the counter value and the counter increases by 1 for each button click action.

Hints

- *Use JLabel to display the counter value*
- *Use JButton and implement ActionListener interface for user click action*

Question 2

WAP using FlowLayout that takes two input from user and display the result (sum) of two numbers in a label when user clicks the add button. Also, handle the exception.

Hints

- *Use two JTextField components for user input*
- *Use JLabel to display the result*
- *Use JButton and implement ActionListener interface for user click action*
- *Use try-catch to handle the exception*
